

# **Pexx, Inc. Completes Phase I of Wireless Networking Project for the City of Baytown**

Pexx, Inc. announces the completion of a contract with the City of Baytown to provide wireless Connectivity to 12 City locations (facilities), these links will provide primary high speed data links between the buildings as well as back up to the dedicated phone links.

In making the announcement Jennifer Greene, President of Pexx, noted that this is Phase I of a longer-term plan to provide connectivity to several city buildings, later adding Voice and Video capability to the IP data links as well as additional features. Additionally Pexx will install broadband wireless connectivity in a number of City Emergency Vehicles providing high-speed data links to key Security and Emergency Services. The major network radios are state of the art Tsunami Multipoint, Quick Bridge and AP 600 by Proxim Corporation of California. This project, states Ms. Greene, brings together several key elements of advanced leading edge network technology moving The City of Baytown to the fore-front of development trends, we are very proud of our technology partnership with Baytown. Ms. Greene went on to state "we have also signed a maintenance and support agreement, and look forward to a long term technology and service relationship with The City of Baytown."

Pexx is a private company providing design and implementation of fixed broadband wireless and wired network solutions from headquarters in Plantersville, Texas.
